Experience

smartMIL — Remote

CTO — *Jun 2026 - Present*

- Established the technical foundation and led development of the Smartmil platform, a benefits club with a marketplace and points wallet, in a TypeScript monorepo (React/Next, Node/Hono, PostgreSQL/Drizzle).
- Defined the end-to-end architecture (web, mobile, APIs, and cloud infrastructure) and the multi-tenant RBAC permission matrix.
- Implemented the financial engine for recurring PIX payments and subscriptions, including trials, upgrades, downgrades, and refunds, as well as cashback and a wallet with an auditable ledger.
- Validated capacity and stability with load tests on critical routes before launches.
- Integrated affiliate partners and external marketplaces, with an automatically synced catalog.
- Lead engineering: code review, technical roadmap, and testing culture (unit + e2e with Playwright).
- Established platform engineering: CI/CD, zero-downtime migrations, and observability.

Gled International Education — Remote

Senior Full Stack & Mobile Developer — *Feb 2025 - Jun 2026*

- Built a children's educational app (web + iOS/Android via Capacitor) from zero to a closed beta ready for store launch.
- Developed the web and mobile applications in Next.js/TypeScript, from the design system to the video player with AirPlay.
- Built data-driven educational games, with a backoffice editor for the content team.
- Created a complete backoffice for managing home, stories, games, and collections without depending on a dev.
- Developed REST APIs in NestJS/Fastify/Hono with unified OTP authentication and integration with the school's LMS.
- Optimized media with a WebP variant pipeline and cached private serving.
- Structured unit, integration, and e2e tests + CI/CD with Docker and automated iOS distribution.

Yoobe — Remote

Mid-Level Full Stack Web Developer — *Sep 2023 - Feb 2025*

- Delivered features and new projects in Next.js/NestJS for a SaaS in production.
- Connected engineering and business by gathering requirements directly from stakeholders in other departments.
- Evolutionary maintenance with version control (Git) and team code review.

DalaCode — Remote

Full Stack Web Developer — *Apr 2023 - Aug 2023*

- Performed continuous maintenance of the Vue.js mobile application, ensuring performance and feature reliability.
- Collaborated with the development team to understand technical updates and implement them in the application.
- Implemented new features and interface improvements in the Vue.js mobile application.
- Troubleshot and debugged issues to ensure Vue.js application stability.
- Actively maintained the PHP web application, including issue resolution and performance optimization.
- Customized PHP functionalities according to specific project requirements.
- Integrated external APIs and services to improve product functionality and user experience.
- Worked with Excel and Power BI to organize data and support business analysis.

- Used version control systems to coordinate changes and collaborate effectively with the development team.

devopness — Remote

Front-End Web Developer — *Jul 2022 - Sep 2022*

- Continuously updated the React web application's design system, using Storybook to keep delivery workflows efficient.
- Used Eleventy (11ty) to generate dynamic and optimized documentation pages.
- Ensured documentation accessibility by following accessibility standards and applying adjustments when needed.
- Collaborated in an agile workflow using version control systems such as Git to maintain effective team delivery.

Self-employed — Remote

Freelancer — *Apr 2022 - Apr 2023*

- Developed mobile applications using React Native and Expo.
- Built responsive, reusable interfaces with React and TypeScript.
- Integrated REST APIs and managed frontend state.
- Implemented user authentication and data persistence with Firebase.
- Published and maintained mobile applications in testing and production environments.
- Collaborated directly with clients on on-demand projects, gathering requirements and delivering ongoing improvements.

Skills

- **Languages:** Portuguese (Native), English (Intermediate), Spanish (Fluent)
- **Technical:** TypeScript, React, Next, Astro, Tailwind CSS, Shadcn/ui, Storybook, TanStack Start, Node, Bun, Express, NestJS, Fastify, Hono, Elysia, REST APIs, GraphQL, Better Auth, BullMQ, K6, React Native, Expo, Capacitor, Firebase, PostgreSQL, MongoDB, Prisma, DrizzleORM, SQL, Redis, Meilisearch, Docker, CI/CD, AWS, Azure, Jest, Vitest, Playwright, Linux, Git, Python, Power Bi, Excel

Education

Federal Institute of Bahia (IFBA) — Brasil

Information Technology Technician Program — *Feb 2018 - Jul 2020*
